the analysis made of the effectiveness of national fishery and aquaculture policies and strategies in ecowas member states and mauritania has shown overall that their implementation faces with problems related to the low level of domestic funding allocated this is compounded by their heavy dependence on external financing through tfp programmes and projects in which the objectives are not always aligned with those of national policies thus the attractiveness of the sector will have to be improved by establishing a much more favourable environment for private sector investment in fisheries

and aquaculture given the substantial investment gaps highlighted by the financial analysis of the various national fishery and aquaculture investment plans the sector's share in the state budget is also expected to increase as it does not reflect the importance accorded to the sector in national development policy and strategic planning documents this meagre budgetary appropriation is one of the main factors making policies in west africa less effective moreover despite the efforts of member states the fisheries and aquaculture sector still faces challenges such as weak participatory governance low human and technical capacity persistent iuu fishing low levels of aquaculture production high post harvest losses etc which detract from the sector's contribution to the fns among the different populations especially in marine and river coastal communities

the war in afghanistan came to an end in 2014 after nearly thirteen years of conflict throughout that period british officials have described uk operations there in various conflicting and often contradictory ways as a counter terrorism mission a stabilisation mission and a counter narcotics mission respectively this book investigates how the war was sold to the british public and how britain's transnational foreign and defence policy impacted on the unfolding of uk strategy in afghanistan and the way it was communicated it argues that because the uk's foreign and defence policy is transnationally oriented meaning that it is foundationally aimed at maintaining alliance with the united states and the institutional coherence of nato uk strategy is contingent upon collective security and crucially is fundamentally concerned with the means of policy maintaining alliances over the ends using alliances to effect change explaining the inalienability of collective security systems to national security is no easy task however and when faced with the adversities of afghanistan the uk state has since 2008 instead opted to describe the significance of afghanistan in narrow nation centric counter terrorist concerns in order to maintain public support for collective security operations there whilst paradoxically framing the conflict in a manner that avoids talking about the transnational structure and purpose of the mission this kind of strategic communication is increasingly becoming a focus of the uk state as it faces a transnational dilemma of maintaining its collective security bonds whilst facing a public increasingly sceptical of liberal interventionism

james k polk was one of the strongest and most active presidents ever to occupy the office in the nineteenth century only jefferson jackson and lincoln matched his overall leadership and domination of national government bergeron s crisp insightful narrative shows how and why polk achieved such stature and yet failed to attract the kind of popular support or retrospective recognition granted other presidential luminaries a native of north carolina polk prepared for the presidency by honing his leadership skills as a seven term congressman speaker of the house and governor of tennessee bergeron s summary and analysis of those years shed light on the foundations of the presidency that followed he provides fresh new perspectives on polk s relationship with his cabinet his skirmishes with congress over domestic economic legislation and the curse of presidential patronage but perhaps the most fascinating portions of this study are devoted to polk s role as the western expansionist by the end of his term the united states had acquired enormous territories in the southwest and far west bergeron demonstrates that polk adroitly used both war and diplomacy to acquire and protect these lands when the annexation of texas led to the outbreak of war with mexico polk was forced to become commander in chief of the american forces in contrast the potentially explosive dispute with great britain over oregon s borders was settled through purely diplomatic means norman a graebner in america s top ten presidents declares polk s achievements in diplomacy were among the most remarkable in american history drawing upon a careful review of the extensive literature on our eleventh president as well as polk s

personal diary bergeron has written a significant and balanced reassessment of the polk presidency in the process he has also created a revealing portrait of a complex man who led the nation with imperial determination tempered with compassion generosity and even humor
